

Super Skincare

When it comes to addressing skin concerns, these cosmeceuticals mean serious business. By Yani Fadzil.

1. DAMAGE CONTROL

RéVive Moisturizing Renewal Cream, RM660

This cream's secret lies in its Nobel Prize-winning EGF (Environmental Growth Factor), a protein molecule introduced by RéVive founder Dr Gregory Brown which speeds up cell activity. EGF helps exfoliate skin and improve its clarity in just two weeks. And best of all? The more damaged your skin, the faster and better it works!

2. EXPERT DELIVERY

Bioxil Advanced Anti-Aging Lifting Essence, RM560

Even the best ingredients in the world won't work as effectively without a powerful delivery system. This essence's unique nano-liposomal delivery system ensures that its ingredients – which include fatty acids, minerals, essential amino acids, and polypeptides – penetrate deeper into the skin to nourish and fight signs of aging.

3. BRIGHT EYES

Hylexin eye treatment, RM475

The makers of Hylexin discovered that serious dark circles are more about the oxidation of blood in the under-eye area, rather than just lack of sleep. The cream's potent ingredients, including sunflower seed oil and power peptides lead the way to optimise enzymatic activity, causing the red-blue pigmentation to fade and leaving you with beautiful eyes minus the "raccoon" effect.

4. POWDER POWER

Dermalogica Age Smart Map-15 Regenerator, RM468

On contact with the skin, a revolutionary technology transforms this powder into a

fluid emulsion to deliver a potent level of MAP – Dermalogica's non-irritating, stable form of vitamin C – which stimulates collagen, exfoliates skin, and brightens skin tone.

5. DOCTOR'S ORDERS

Murad Intensive Wrinkle Reducer, RM748

This product contains lipoamino acid and cinnamon extract, along with Dr Murad's GlycoNutrient Complex, to combat five skin problems – bacterial growth on the skin's surface; lipase enzymes, a cause of skin irritation; androgens, which stimulates breakouts; elastase, which attacks collagen and elastin; and free radicals, which cause cellular oxidation.

6. CITRUS LOVE

Kiehl's Dermatologist Solutions Powerful-Strength Line-Reducing Concentrate, RM240

Kiehl's Dermatologist Solutions range combines the brand's rich pharmaceutical history and research partnership with Harvard Medical School. The potent serum is the perfect example of this; it contains a sophisticated formula starring pure Vitamin C (one of the hardest ingredients to stabilise in science) to enhance radiance and diminish fine lines and wrinkles.

7. ANTIOXIDANT BOOSTER

Zelens Skin Science Radical Defence Serum, RM702

Dr Marko Lens, the founder of Zelens, was working on skin cancer research when he discovered that all it takes is the right antioxidants. This anti-aging emulsion contains 12 strong antioxidants, personally selected by Dr Lens himself, to keep skin healthy and protect it against the three most damaging types of free radicals.

8. SKIN WORKOUT

Perricone Face Firming Activator, RM545

This daily lotion combines the brand's two star ingredients – Alpha Lipoic Acid and DMAE to minimise pores, fine lines, and skin discoloration. DMAE also blocks the production of enzymes that damage collagen fibres, so your skin will firm up to the way it was five years ago. ■
