

Total beauty

BIOXIL is a new beauty system that taps into a cult idea: skincare and nutrition.

It combines a "cosme-ceutical" skin care range and a supplement line to offer a complete formula in skin care that protects and repairs outside, while cleansing and nourishing inside.

Bioxil skincare products include anti-ageing and whitening lines, with ingredients such as daisy flower, vitamin C ester and White Tea essence, and a

lifestyle category that includes dermal and cell repair.

Innertreats features three nutrient-rich supplements, including Inner D-Tox, a fruit and vegetable formula with green tea, dandelion and Skin Radiance with immune system booster echinacea and marine collagen.

The products are available exclusively at Bioxil Skin Lab, KLCC. More information, www.mybioxil.com.
